# ” 40 PSY...

Danish generations of experience and commitment adds up to the very best in pig farming: 40 piglets per sow, better animal welfare, sustainable solutions and a more profitable business.

For more than 100 years pig production has been an important asset to Denmark, both in terms of employment and export.

The Danish pig industry is among leading pig industries of the world in breeding, quality, food safety and traceability. Denmark is the world's leading exporter of pork. The key to this success lies in cooperation ensuring complete control of all steps in the production chain.

# All in one place...

Here, you will be presented to modern technologies.  
You will acquire the newest knowledge, and find inspiration for your future projects within professional pig farming.
